Profile

I am considered a highly curious front-end developer, who embraces and manages challenges with a learning mindset.

I am passionate about creating beautiful and responsive websites, which provide clean and user-friendly experience, while being motivated to learn new technologies in a fast pace.

Education

Hack Your Future Copenhagen

Web development

2019 april - 2020 jan

Learnt programming and different development technologies through creating web applications from scratch each week, individually and in collaboration. E.g.: weather-app, Mealsharing site, Github user searcher, Emoji-finder, Shopping site, Todo-list, Giphy-finder, Final project.

Metropolitan University College, Copenhagen

Bachelor's Degree in Global Nutrition and Health
2013 - 2017

Addressed global challenges of health promotion and disease prevention on individual and community levels.

Experience

Freelance webdeveloper

Copenhagen Sound Lab - 2020

Building website from scratch using React, Storybook, Sass, Figma, Photoshop.

Frontend developer

Packitup Ivs - 2020

Working on style for desktop, android and ios of a Progressive Web App using Sass, and creating new login/signup pages with Vue, Firebase and Firestore.

Full stack developer

Final project of Hack Your Future - 2019

Creating a full stack web app using React, Storybook, Firebase. Building API routes with Node.js, Swagger and database with Knex.js and MySQL.
