John Alyazji
Front-End Developer

Profile

I have recently graduated as a Front-End Developer from coding school HackYourFuture- Copenhagen.

I gained massive experience of being in HYF school. I am fascinated by web programming, developing apps, and building websites.

I am keen to gain more experience in the field. For this reason, I am looking for a company willing to offer me a placement among its developers. In return, I would offer my full commitment, and be a pleasant and friendly addition to your team. I am therefore currently looking for a job or an internship as a front-end developer.
